## Transitions<sup>™</sup> Engineered Wood

*The fastest way to a new,  
engineered wood floor!*

moderna Transitions Engineered Hardwood Flooring utilizes state of the art technology. Beautiful quarter sawn veneers are merged with the proven technology of a water resistant HDF substrate and a Northern Fir back layer. This highly stable engineered wood floor features beveled three strip planks for a classic modern look. Despite its strength and stability, Transitions Engineered Wood Flooring, with an overall thickness of 7/16", is still thin enough to be used over existing floor coverings.\* This makes it ideal for that special renovation project. Easy to install, Transitions is the fastest way to a quality engineered wood floor. Our product selection offers a species for almost every design application.

### NEW TECHNOLOGY

- Winning combination of quality HDF & wood veneers
